EDUCATION

Heidelberg University

August, 2024

MBA. GPA: 3.9

Tiffin, OH

- Completed an accelerated MBA program while working full-time.

Heidelberg University

May, 2023

BS, Computer Science. Minors in Business and Music. GPA: 3.87

Tiffin, OH

- Graduated *Magna Cum Laude*, inducted into the Heidelberg University Honors Society, dean's list every semester.
- Recipient of the Martin A. Reno Emerging Scholar Prize in Computer Science.
- Member of the Heidelberg University Marching Band, Jazz Band, Concert Band and Concert Choir.

WORK EXPERIENCE

The J.M. Smucker Company

Senior Developer, Supply Chain

July 2025 – Present

Remote

- Designed and implemented a modern file transfer system built on AWS, utilizing Transfer Family, Lambda, S3, SQS, and other AWS services.
 - o Wrote a Python based PGP encryption/decryption Lambda system.
 - o Wrote/Modified Cloudformation templates that utilize Service Catalog to deploy the file transfer system as needed to workload accounts.
 - o Act as subject matter expert for PGP encryption, SFTP, and file transfer systems.
 - o This file transfer system is now being used company wide to replace an aging on-prem system.
- Wrote multiple python based lambda solutions to do last-mile delivery of files to on-prem servers / users
 - o Wrote code that uses Amazon SES to send files to users.
 - o Implemented a system that will upload files to Sharepoint from AWS.
 - o Created code that will rest call on-prem resources for them to grab and consume files.
- Assumed ownership of the Accounts Payable domain.
 - o Righted a variety of ongoing issues that had been plaguing the AP space, greatly reducing pager spam and time spent on issues.
 - o Created and enhanced PL/SQL packages and Bash scripts that deal with payment batches, vendor emailing, and importing invoices to the on-prem Oracle ERP system.
 - o Implemented invoice integrations for multiple edge-systems.
 - o Served as tech lead for banking integrations, as well as a project to outsource check processing.
- Driving modernization as part of the team leading the company from a 20 year old on-prem Oracle ERP to Oracle Fusion Cloud ERP.

The J.M. Smucker Company

Developer, Supply Chain

June 2023 – July 2025

Remote

- As a member of the Planning and Procurement team, I developed solutions using a variety of programming languages and AWS/on-prem resources.
 - o Architected and implemented an AWS cloud stack that manipulates XML data from vendors that eventually

- creates a Purchase Order, under a tight one month deadline.
- o Enhanced an AWS Lambda based solution that manipulates data between on-premises Oracle databases and a cloud vendor.
- o Developed PL/SQL packages to support Demand and Supply Planning operations within the company.
- o Maintained integrations with cloud vendors, including database package changes, Javascript, and Python.
- o Created a SnapLogic based solution for requisitions related to Indirect Purchasing.
- o Led a reduction of tech debt in our space, phasing out over 150 Informatica workflows and BI Publisher reports.
- Presented Playwright tests and API testing concepts during a large internal developers forum to over 100 attendees.
- Undertook PagerDuty shifts, supporting night batch processing.

The J.M. Smucker Company

May 2022 – August 2022

Cloud Engineer Intern

Orrville, OH

- Developed an AWS Serverless Application using SAM CLI.
 - o This was to develop a CRUD application to manipulate recall data for JIF peanut butter.
 - o The application infrastructure was set up in AWS and the application developed within two weeks.
 - o Implemented Lambda, Lambda Layers, and other AWS technologies.
- Researched and implemented Bref, which allows PHP applications to run on AWS Lambda.
- Developed proof-of-concepts and implemented a variety of AWS technologies:
 - o An AWS POC that I developed dealing with Docker containers, Lambda, and Aurora was considered as a replacement for an existing asset management system.
 - o S3, EC2, DynamoDB, CloudFormation, CloudFront, SAM, API Gateway, Lambda, etc.
- Developed a PHP script that processed files and converted them when POSTed to the website.

Heidelberg University

August 2021 – May 2023

Student Help Desk Support Technician

Tiffin, OH

- Responded to tickets and walk-ins regarding a variety of campus and device issues from students, faculty, and staff.
- Imaged and deployed over 150 laptops and desktops campus wide.
- Installed and deployed a new campus event display system.
- Deployed Cisco VoIP phones campus-wide, replacing a traditional analog phone system.
- Repaired a variety of Apple products, including MacBook batteries, iMac screens, and iPhones.

GreenStone

May 2021 – August 2021

System Administrator Intern

East Lansing, MI

- Streamlined and created dashboards using SquaredUp for SCOM, to facilitate a single pane of glass look at the environment.
- Implemented SCOM Management Packs for a new build of SCOM on Windows Server 2019.
- Documented an Azure failover test for Disaster Recovery, replicating servers in Azure and testing the functionality of the DR plan.
- Facilitated the return of 35 branch server hard drives with frequent support through phone calls.
- Built Power Automate scripts to help with maintenance day planning and server maintenance.
